

# Leaders Improving Mathematics Education

## SEND

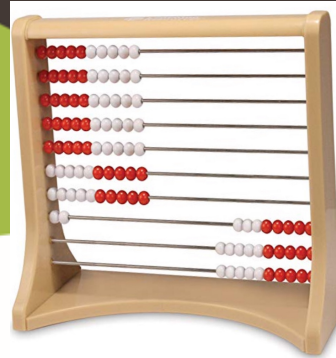

# Amy

# How

Venue: HOLLINWOOD  
ACADEMY, OL8 3PT

Thursday 10th  
October

4pm - 5.30pm

**Target audience: Primary & Secondary SEND**

Amy is a Canadian who moved to the UK to pursue her dream of spreading the word globally on using the rekenrek. You will leave this hands-on session wondering why you never heard of the rekenrek before! You will be introduced to the most versatile, visual, concrete manipulative that will change the way you feel about using the Concrete, Pictorial, Abstract approach in KS1 and KS2. This session will focus on how to teach the basics using a manipulative that allows children to build, practice and UNDERSTAND the foundations of numeracy such as partitioning numbers, subitising, mental math strategies, number facts, and of course addition and subtraction.
