REFLECT, EXPECT, CHECK: MY TAKE ON INTELLIGENT VARIATION IN MATHEMATICS

Since my book 'How I wish I'd taught maths' came out in January, I have become increasingly obsessed with the power of intelligent variation in mathematics. In this workshop I will look at four different categories of activities - Practice, Rule, Pattern and Demonstration - which I believe can be used across all topics and all classes to help students think harder about the questions they answer and the concepts they encounter.
